## PROJECTS

**Quote to Cash**

Designed and developed a comprehensive Invoice Management System using ASP .NET Core MVC and Web API, allowing users to generate customizable sales invoices with branding and payment terms. The system enabled efficient tracking of sales and purchase records with real-time financial insights

- **Invoice Generation:** Developed functionality to create invoices by fetching essential details such as invoice numbers and dates (auto-generated on the current date).
- **Data Integration:** Implemented database integration to retrieve party names, shipping addresses, and inventory items for seamless invoice creation.
- **Inventory Management:** Allowed users to select items from the inventory, specify quantities, and automate tax calculations based on predefined rules.
- **Recurring Invoices:** Integrated the option for recurring invoices to automate billing for regular clients.
- **Sales Tracking & Reporting:** Developed a dashboard for users to track daily sales performance, offering insights into financial metrics.
- **PDF Generation:** Enabled users to download invoices as PDFs for record-keeping and future reference.

**Technologies Used:** ASP .NET Core, Web API, MS SQL, .NET Core MVC
**Team Size:** 4

**School Suite**
Developed a comprehensive Teacher Management Module within the School Management System to enhance functionality for managing teacher profiles, student attendance, and performance tracking.

- **Teacher Profile Management:** Implemented features to manage and update teacher profiles, including qualifications, contact information, and subjects taught.
- **Attendance Tracking:** Designed and developed a portal for teachers to view their attendance records and track
- **Student Performance Management:** Enabled teachers to assign grades, monitor student behavior, and manage student performance through an intuitive interface.
- **Leave Management:** Integrated a leave management system allowing teachers to apply for leave and track the approval or rejection status.

**Technology Used:** ASP .NET Core , Web API, MS SQL, .NET Core MVC
