  - Debugging
  - Git
  - Java
  - C#
  - SQL

Projects

Project Title	Aig Forge Hub
Technologies Used	ASP.NET Core Web API, C#, SQL Server, Microservices
Organization	Masstech Business Solutions Pvt. Ltd.
Team Size	5
Description	• Developed a microservices-based procurement platform focusing on vendor management. • Implemented independent services with clear separation of concerns. • Designed REST APIs for vendor onboarding, data validation, and service communication. • Ensured scalability, maintainability, and loose coupling between services. • Worked on API testing and documentation using Swagger and Postman.

Project Title	Crypto Ledger
Technologies Used	ASP.NET Core MVC, C#, SQL Server, Entity Framework
Organization	Masstech Business Solutions Pvt. Ltd.
Team Size	5
Description	• Built a ledger-based system to manage cryptocurrency-style transactions. • Implemented transaction history tracking, balance calculations, and validations. • Designed secure APIs to handle data integrity and consistency. • Focused on backend logic, database structure, and performance optimisation.

Project Title	Smart Society
Technologies Used	ASP.NET WebForms, C#, ADO.NET, SQL Server
Organization	Masstech Business Solutions Pvt. Ltd.
Team Size	5
Description	• Worked on the admin-side modules of the Smart Society application using ASP.NET WebForms and C#. • Implemented functionality to create and manage societies, buildings, units, and members, ensuring proper data validation and consistency. • Developed admin features to add, view, and manage amenities available within the society. • Designed and maintained SQL Server database tables for societies, buildings, units, members, and amenities using ADO.NET. • Implemented role-based access control and session-based authentication using Forms Authentication to secure admin operations.
